i just bought bf2 and i was going through deleting things so i could play it and i delet my sound file and i went and did a system restore and restored it back a couple of days and now when i go to delet ren or play it it says this

this is what it says when i go to uninstall ren

this is what is says when i got to play ren

Renegade appears to be no longer installed. The file size says 21mb when it should be around 700mb. A clean install should fix this right up.

Still leaves the question whether or not you want HORQWER or something in it...
