here somethink somethink need work with texture ok?

i do all alone!....

i realy dont like FEAR font on armor/health... so i put them as menu lol
also i can move them to a path beyond mod...

and here what i made if i havent map overhead (radar screen shows in all maps)

Is "and its better Sir Kane's ('_")" supposed to mean "and it's better than Sir Kane's ('_")"?

If so: lol.

You can't even manage to get the textures right.

I think it needs to include some sort of server-side disable option. Otherwise, this will make you far more popular than SK, who is just a selfish person.

Indeed, although I might be missing the point, I don't fully understand how this works, but if its possible, make it 3d so when you look up,... you see the side of the buildings in the radar, idk, i don't know much about hud...

make people hate you even more.

All the code and the functions are already available. JonWill has made an easy to understand guide in bhs.txt. All scrin has done is written his hud.ini file according to the instructions of JW in BHS.txt and made some .tga files.
I made a crappy version in 60 minutes, anyone can make a replica of this in a day if they tried...

and bug 3..... noone of you cant run this hud cos get message "bhs.dll.error,pls report it"
i know cos i give them to my old mates and all cant play
and if you cant play with this hud no sense release them yet
so gg....

First off learn english and get out your house for once you fucking geek. Maybe you'll discover grass isn't tiberium.

Secondly. I administrate Renz0r's hosting. I could care less about the community itself (no offense RenAlpha, I don't like recknefag).

All you have to do is start speaking proper english and stop abbreviating every word. It makes you sound like a retard.

Then tell us what you mean in PROPER ENGLISH and not some abbreviated txtmsg language. This is a forum, not your mobile phone.
