i followed this tutorial

http://renhelp.laeubi-soft.de/index.php?tut=40

but when ever people try to join my server then get disconnected seconds after joining plz hellp

are u using ssaow or ssgm? if ssaow what version? cause the server will crash if u use below 1.51 if you need a link here's one > http://game-maps.net/index.php?action=file&id=607

Also might want to try this tutorial > http://renhelp.net/index.php?mod=Tutorials&action=view&id=13

that tutorial your using is not up to date I think, also this is the new address to be http://renhelp.net/index.php

not that im saying that is a bad thing or that does not work but I think it is better for the person to get more experience by setting up thier own bots but it's not my choice here so pick whichever way

Did you create any new presets in your objects file? This will cause clients to disconnect and/or crash when they join the server.
