Do NOT change damage server side. It's useless anyway: the client determines the damage.

Don't change the biatch setting for PT detection.

It bans because you're doing something that isn't meant to be done. So, you can either:

- 1) Not do it, and use the PT properly, from within the building, or...
- 2) Disable BIATCH.

Complete either of those before coming back here.

With the standard rof threshold BIATCH won't complain on accessing PT's from outside the buildings.

Use the PT normally then.
