Ladies and gentleman, I present you the most realistic driving simulator in History, with THE highest score on Gamespot. A truly free roaming game in every sense imaginable.

Um, that game seriously looks like it was made on the same engine as Renegade without certain things like vehicle blockers and whatnot.

That's what I thought.. It's the textures that did it for me.. and possible vehicle physic changes..

Leave it to a video game to make something as awesome as Semi-Trucks look totally shitty.

I read something that said the developers went on strike before they got very far, but the company decided to release it anyway.

Or maybe that's something I made up to rationalize why it ever came out.

Opps, sorry for the double post, I hit edit and though I had already copied the quote into my previous post.

It couldn't be, they would have fallen into blue hell when the reviewer went off the map.

I think if the weight of the truck was set too low it would go up the mountain quickly.

I bet they didnt have a weight. It's just a model attached to a terrain, and all you can do is move it around.

Holy shit.
The developers stole the source code for Renegade and didn't understand 3/4 of it and ended up with this. Hehe.
