He tried to parse http://http//de.youtube.com (don't click that).

Take out "http//" to leave "http://de.youtube.com<blahblahblah>".

He isn't cheating, He's using free aim (Press V in Renegade, duhh..) while moving, he just had good hand eye coordination.

As for islands tunnel walls, You type a command in via console and they disappear, You can't shoot through them or walk through them.

So no.. He isn't cheating.

Hmm WAIT, he is hacking, check his ammo. You don't reload that fast normally.
And the water disabling could be considered cheating too.
But he has instant reload hack or something like that. Not sure what he did, but it is something that prevents his ammoclip to go lower then 3

Ryu wrote on Mon, 19 November 2007 04:02As for islands tunnel walls, You type a command in via console and they disappear, You can't shoot through them or walk through them.

Although the speed right now is to shity to see in detail what exactly is going on.

EDIT: Hell YES!!!!

You are right he is hacking, he would fire a shot so it would go down to 3 then when he fired again it would go back to 4, and it would keep doing this over and over again. Clearly this is gives him an advantage because it save him an extra 5 sec reloding, thus giving him an "edge". Good eye!

I can't believe he was stupid enough to show him cheating, and expect no one to notice....just stupid.

Besides he does not really "own" he actually just sucks really.....

I take it you don't use scripts.dll, and play on sniper servers?

scripts.dll has a some weird command to make the walls on the tunnels to disappear, And some servers use a modified objects.gm so you never have to reload (Sniper only servers).

Gee wiz you guys, I thought you people played this game?

Stop the cheating paranoia EWD, it's annoying.

scripts.dll ? This command already has been there when Renegade came out, and it was never considered as cheating.

Hey dudes, I think I know what I'm talking about.
The scripts.dll made by Westwood doesn't contain a single console command. The standard
console commands are all in server.dat, game.exe.
WW Scripts.dll only contains ren scripts.
It's only jonwil who renamed scripts.dll to scripts2.dll, and who abused this library for other stuff
than ren scripts.
And the exit command is made by jonwil too.

Subject: Re: Hacker Vid

There still isn't to this day console commands in Jonwil's scripts.dll.

Where do I learn to customize bhs.dll? Where are the instructions and stuff. I noticed that there is
a section called "bhs.dll options" in the menu, what is that? And how do I customize the
commands?
