Waaaay too many threads.

Just make one topic and ask all your questions in there, no need to make a new thread every single time you have a single question to ask.

As for the building, nothing I know of.

Buildings aren't hard to make. Just start making squares and cylinders and shit then cut holes in them with boorleen. Or something, I'm sure there are other ways as well. Experimentation is the key, just play around til you get something you like.

As for the building, nothing I know of.

What? Don't be silly oblivion, then I wouldn't get as many points added to my post count.

Use the boolean tool in RenX, I also suggest adding it to the tool bar as it is used a lot.

Basically, you select an object and then you click the boolean button, then click "Pick Operand B" and then select an object that is inside or intersects the current object, the first object will hollow out around the second one.

it sound very hard to do

and no i will not stop double posting if i dont want to just f**k off

if you keep saying that im gonna make 20 post with S in it only

then make loads of threads so f off

anyway so Jerad2142 i dot know what you mean is there a tutorial on it at all
