Please don't ask that. One more thing I will ask, how do you find the code for mods?

What do you expect it to do?

You download it, run it, it patchs the server, allows a game to be played even with just one player.

But, the first player will have to leave and rejoin when he first joins it, sometimes.

No I mean the patch to make the game not say gameplay pending, like I make my sever and I have to wait until someone else joins.
