everytime i join a game WOL or not WOL  
or even singleplayer  
from game.exe or renegade.exe  
i go in the game for 3-4 seconds  
then it goes back to renguard and says :

[21:38] Unauthorized file data\config\Desktop\_.ini has been found in your renegade directory.  
[21:38] Unauthorized file data\Desktop\_.ini has been found in your renegade directory.  
[21:38] Unauthorized file data\save\Desktop\_.ini has been found in your renegade directory.  
[21:38] You have been disconnected from RenGuard,

i thought deleting these files would solve it.. but i cant find them , these files dont exist .. hidden or not hidden

and my game closes  
i have 1.0323 renguard and core patch 2  
when the problem started i expreienced a hell of a lag ingame online

They must do. Check C:\westwood\renegade\data\config, C:\westwood\renegade\data and C:\westwood\renegade\data\save.

i can see hidden and system files .. but these files dont exist  
i tryed deleting them from CMD  
not found

---

and my C has no westwood file..

i reinstalled the game  
but changed the directory to west-wood  
works fine now thnx for all the people who helped me to get to CMD and who showed me that 9  
step reinstalation guide  
thank u..

It still seems weird. I'd scan for viruses and/or spyware if I were u.

Yeah, it sounds like some program is replacing the Desktop.ini files, forcing Windows to save it's  
own with an underscore.
