Everyone, look at this! <http://www.cnc-comm.com/news.php>

There a small group making a alternitave westwood online. There has already been a smal release between the beta testers, but the servers are currently offline. in a nutshell, it simply allows you to play ALL the C&C's excluding Generals + ZH and C&C3 online. Even Sole Survivor and Nox and all the other WW classics.

It is like XWIS, it will allow you to connect to the Westwood created C&C games over the internet

like back when WOL was still around.

It MIGHT bring it back to popularity, personally, I would love to see C&C95 boom again. Other features of the program are, Admins and moderators, Im not sure how that is going to work.. we will have to wait and see.

Damn right it's late, but I never got a chance to play Tiberian Dawn online...

I've seen plenty of WOL clones try and fail, so good luck. Personally, I would never send my serial to a server that wasn't hosted or sanctioned by EA and it would be stupid for anyone else to.

Its not my program . I just said I would let people know about it. I have tried the program out, I cannot release it though. It works perfectly, but they brought down the servers to fix some bugs.

Hello guys. I am here to say that AWOS does not support any game that uses the EA server, like Generals or Tiberium Wars. we only support these games:

Command & Conquer Tiberian Dawn
Command & Conquer Tiberian Sun
Command & Conquer Tiberian Sun Firestorm
Command & Conquer Red alert 1
Command & Conquer Red Alert 2
Command & Conquer Red Alert 2 Yuris Revenge
Command & Conquer Renegade
Emperor: Battle for dune
Nox quest
Dune 2000

and Westwood Chat

AWOS does not require a serial, so don't worry about us stealing your serial.

Sounds good.

By the way, in games like Renegade, it sends the serial to the server by default. I believe that is what Crimson means.

The WOL clone you're using has to be some form of a script/program.

It;s a program where you enter a IP address which connects to the servers, allowing you to join a lobby.

Subject: Re: AWOS

Yes, but the server end is running a script/program that makes it possible, just like XWIS.

Subject: Re: AWOS

Posted by [cnc95fan](#) on Fri, 28 Dec 2007 16:33:03 GMT

[View Forum Message](#) <> [Reply to Message](#)

True, like an FDS for C&C95 - Renegade + RA2. Still though, I want to play Sole Survivor online, which you can't do with XWIS.

Subject: Re: AWOS

Posted by [Ethenal](#) on Fri, 28 Dec 2007 16:54:35 GMT

[View Forum Message](#) <> [Reply to Message](#)

Btw the way XWIS used to run it, you modify hosts.conf so it would connect to XWIS without any extra modification. That's the best way to do it IMO.

Quote:Yes, but the server end is running a script/program that makes it possible, just like XWIS.

True, I misunderstood what he meant.

Quote:The WOL clone you're using has to be some form of a script/program.

I'm not in charge of the server, SyS is. I'm only the website manager...

Quote:It's a program where you enter a IP address which connects to the servers, allowing you to join a lobby.

The program used to connect is not ours its XWISC, the old program that let you connect to XWIS before EA supported them. And if you type in the IP of our servers you can use the entire AWOS network, not just one lobby.

These forums don't recieve money from EA do we? Nor did we sign any kind of xwis-type agreement with them to stop piracy did we? Did not think so. Why filter? I know the rules, no support for warez/w.e, but I was not promoting piracy. I was saying piracy keeps players playing, and stated a fact, which is since XWIS semi-recently turned on the serial checker, we have lost a large group of players, ever so suddenly
