Before anyone gives me the link to the standalone downloads please note: I KNOW those are there. I tried those but they don't work for me.

Now, I reinstalled Renegade due to the 1.037 patch not being able to install. I had the core patches installed then. Now, renguard wont auto-download the core patches. I looked in my renegade folder and it says I have the patches downloaded. I look into my commands folder, and I tried this in-game too, but I only have the basic commands, so I KNOW they arn't installed.

Help please?
