If shaders.dll and d3d8.dll are in your renegade folder delete them, if not then may I ask is your computer new or fairly old?

Is this TFD(The First Decade) or the stand-alone Renegade?

If it's The First Decade, you'll have a large blue box with "The First Decade" written on it.

Well the stand-alone version needs the 1.037 Patch >  
<http://game-maps.net/index.php?action=file&id=402>  
The First Decade doesn't.

EDIT: You could also try the 2.9.2 scripts(<http://game-maps.net/index.php?action=file&id=603>) but I would suggest doing a clean install before installing the patch and scripts.

When installing/reinstalling use this guide >  
<http://www.renegadeforums.com/index.php?t=msg&th=24533&start=0&rid=2> 1525

I know that this is a bump,

But I am having the same problem (when I'm loading a game it gets close to the end and crashes) I am running The First Decade, which has the latest Renegade Patch, I have CP2 installed and thats it, I don't have anything else installed, except 4 some skins, but I heard that doesn't make a difference.

I really recommend to simply reinstall everything following this guide:  
<http://www.renegadeforums.com/index.php?t=msg&th=24533&start=0&rid=4> 882 .

I have looked at that topic before, but I can't re-install the game, my disk is too scratched.

Its sort of like a copy of a CD/DVD, but then as a file instead of another CD/DVD

Oh and you'll need some sort of mounting program to mount the isos, I recommend MagicDisc.
