Building Preset Pre-Release1/7/08

1/7/2008

Inside you'll find buildings to place on your maps. I've included placeholders of the Walls, Gates and Defenses that will be included in the first release. These are objects placed in level edit but these will help you sculpt your terrain around them. You can then place them in level edit when upon release.

- Joe

I would also assume you have a model of the TS watch tower but is it player accessible?

The terrain model I have in mind would benefit from some.

The GDI Barracks is a tad small compared to the rest of the buildings

of course that works for my map as the GDI base area is smaller  
seeing it was originally made for normal ren...the AS is farkin huge

Renardin6 wrote on Mon, 07 January 2008 22:00why not tell me more

It's still in early planning stages. More will be revealed when i finish the designs on paper and actually start the modeling process ^\_^ . I can only say that Nod will always win on this map .

Also, if any, can you provide some sort of a back story for Nod's characters? Eg. the fiction behind Lilith, the Kerubim, etc?

---

I would rather not do that now.

Why?

I plan to replace most of nod infantry especially all the characters based on old reborn design, lillith and flamer trooper... Why? They suck.

Does it change anything to the mod? No. Weapons and all will be the same, let's just say a new model for nod soldier will replace them all with some variation as you have for the current model.

Here is a preview:

This will not delay the mod as it will be released with current models.

My small advice would be to keep the kerubim character intact (well, perhaps a model update or something ), since he has a very interesting design, reminding both of Nod's Soviet Empire connection and Nod's incarnation in C&C3 (the headgear).

And perhaps this is the time that i brag (again, just like a few years ago ) about including Nod's Toxin Soldier as a character

---

The model we keep for nod are:

Mutant Highjacker, Kerubim, Nod Cyborg Commando.  
The rest will be replaced by better models.

Gdi side, we keep umagon, ghostalker and the gdi mutant, the rest will be replaced by better models.

THIS won't delay the mod in any way, the models will be replaced trough patches when done.

I would love to help any team out, but when it comes to the maps, it would be nice if there were some objects predone to import such as vegetation and other misc stuff.

---

Textures should also already be picked out for maps, so there doesn't end up with some maps that have really low resolution(or high)textures. I find there isn't enough included to even start something half decent that matches with the rest of the maps.

I can surely start some terrain, but when it comes to textures i am at a loss of what textures specifically to use. Like i am sure you don't want maps to be made with tiny 128x128 and 256 textures from normal ren?

This does remind me of Red Faction though... it's maps were usually entirely tunnels.

If only we could make our own tunnels in Renegade. lol

My siggestion would to be removing all of the dead ends and having it so you can just keep running instead of having to turn around. As it is I can tell you that this map won't be very popular The map didn't originally have dead ends. But after I posted the first WIP, someone suggested it, and everyone agreed, and so I put in dead ends.

Ryu wrote on Fri, 11 January 2008 08:09crazfulla wrote on Fri, 11 January 2008 13:24does anyone actually give a fuck about my map or shall I give up now?

dude, Perfect it, more screen shots, then we'll talk.

I can get you more screenshots no problem...

But I can't perfect it until I get terrain objects.

that is IF the reborn staff are willing to share?

may I ask modelers to hurry to submit their final project for next weekend?

We will then pick up the best map and finish (adding some stuff) and make the lightmap for it.

So next sunday, have the map ready.

Next sunday.. Hmm.. that means I am going to have to make a choice...

Rift or Burrow.

You know what, since someone else's name is also on Burrow, I think it be better to submit that one.

Good thing I have my second winter break from school! (Mid term week, and I don't have a single test til next friday, so no school )

What happens to the winning map(s)?

Does the Reborn team take full control over them and edit what they like? Or can the original map maker go back and change stuff up as later versions come out?

hey i could make a fair good map if u just release the .max version of the buildings and give me some more time plz can u give me mroe time?  
this is for every one  
i recommend u to use 3ds max 8 even if u dont have money get a crack version of it it is the best better than renx and it is too easy to model on it

Because of glorious RenX my entire terrain file corrupted itself, God only knows why.  
Note this is an entirely different map to that in the screenshots I posted...that one was too huge.

---

Anyway it might take me a little longer than the weekend to finish it from the last backup

---

---

Hmmm I think then the maps might not be included in the release but in a patch not much later. Because your maps need to be lightmapped by our team

---

---

Ok, that sounds even better.

But lets say after that though... since we are only limited to some of the buildings, and none of the textures, if we say wanted to go back and edit something later when more of the mod is released?

Because I actually have a second map, that I want to have vehicles on, but as it stands now, infantry only would actually work pretty good.

Would we be able to go back and edit it ourselves, then resubmit it? (Or then again we could just use it as a fan map)

Ok, I think I am pretty much done. There might be a few minor bugs... I am not sure.. I gave it a good going over.

Do I need to set up VIS?

If not, how do I submit the map?

TBH Im looking forward to that tunnel map, looks killer for infantry warfare so throw that one in  
I will get around to mine and submit when the full mod is released.

Whooh! It's not corrupted!

It doesn't matter to me if it is in the Beta or not. However I can't speak for anyone else. (Especially THeTA who I know is looking forward to it. =)
