Hi

anyone needs a 1gb disk space  
cpanel acces  
100gb datalimit,

almost no limits!

you can have this in exchange for a FREE  
teamspeak 2 server 15player slot.  
on a 100mbit connection.  
+ Teamspeak super admin control panel acces etc.

---

i does not have to be a 100mbit connection.  
but if i notice lag on a full server = termination of the webserver account.

Lol, so if your internet has a slow day and you lag a little bit your going to remove the web hosting account which is nowhere near worth a 15 player server anyway? ROFL.

Noone is going to give you super server admin access. Because then you could open more servers, lookup registered peoples passwords and whatnot.

Just a little side note, a typical home connections (Being Cable/DSL) has enough upstream bandwidth to host a 15slot TS server using the highest codec TS has to offer.
