I am having an odd problem where sound works perfectly in the game but there is no sound in the movies, any movie not even the intro.

I purchased renegade in The First Decade box and have updated it to CP2, scripts 3.4.4, RenGuard 1.0323, and the version of the exe is 1.4.0.

I am currently on Mission 7 and would like to hear the movies. I can connect to the Internet and play multiplayer so I have no idea what is causing it.

Any help?

The sound in the movies is not compatible, anyway the movies are nothing special. :S

They are.

I can only suggest two things, downgrade to the original scripts.dll (that might be the problem) or, extract the movies from the Play disk, and use Bink Tools! to watch them manually.

I like the movies for their story and they don't look too bad. I watched them all on Youtube now, but I'd like them to work in the game.

Very odd problem indeed. Did you try removing the new scripts then? They do indeed, like mentioned, sometimes give problems with the single player.
