I thought I had made this name up, but it seems some other people have used it as well. Just want to comment on this as I have received messages asking about it.

Eg

Myspace-Not me

DeathDealer101-I only use the Name Dthdealer

Starcraft-Not me

LiveVideo-LiveVideo?

"MocoSpace"-Not me

Pool-I don't even know how to play

I believe there are tonnes more, but the only forums I use under this name are Renegade Forums, Meteor 2, Dark Gravity, UN-RULES (no longer use) line rider(also no-longer use), Google video and Dcom.productions and the only online games games I play Are Renegade, Assault cube and Sauerbraten.
