After playing this crappy game called america's army, i decided i wanted to play renegade again.

I started the game, and the westwood online did not work.

I reinstalled couple of times (yeah mcafee can really screw things up even when its not running)

I updated renegade

I installed the latest renguard

Now after i have launched renquard and press Renegade to play, i get the following error:

little bit of translation (the .. is the long thingy)

Can't find entrypoint of procedure ... in the DLL file BandTest.DLL

I didnt have this error with the old version of renguard -.-

How can i fix this??

You (somehow) have ended up with the wrong version of bandtest.dll, so just dump my copy in your C:\westwood\renegade\ folder and you're done. (This assumes you did patch your Renegade to V 1.037 and THEN install Renguard).

i got the same error

1.installed renegade

2.go ingame and installed the patch

3.get to playing ingame

4.get renguard notification and i download renguard

5.installed and start up C&C:renegade by renguard

6.i get this lame error (check above)

7.i tried the bandtest.dll posted above ( same error)

8.i'm desparate and posting on this forum

May I suggest getting the patches from here and only using the latest Renguard installer here.

Also, please follow this reinstallation guide.
