EA Screwed renegade hard.

It used to have dynamic lighting, see the heli shadow.

Man!

Beta looks fun, but that looks more like a painting than a screenshot.

That doesn't look like ingame...At least judging by what Renegade looks like now. Seems to be an artist's impression sort of drawing.

But it says "Actual screen shot" down in the corner there.

I bet just the area is the screen shot. The characters, vehicles, and shadows where probably drawn in there.

If you are using firefox, right click on the non-clickable link, and then click "view image"

It wasn't working for me either when I first came into the thread.

no i dont use firefox

i use IE 6 or 5 or whatever installs with XP Pro

i right clicked it nd clicked save target as then looked at it then

I think it was simply a high-detail render.

They didn't say "actual screenshot" of what- So my assumption is that it's an "actual screenshot" of a concept render.

concept art, somebody just labelled "actual screenshot" at the bottom.

ive seen the same image without the tag at the bottom

You sure? The textures for those soldiers are still in the always.dbs file.

Its real at least I believe if you ever watched the beta videos it looked a lot nicer then renegade does now.

EDIT:

This is what it was suppose to look like

This it what it did look like

http://www.dailymotion.com/video/x2p1eq_renegade-beta-video_videogames

http://media.pc.ign.com/media/013/013180/vids_2.html

So basically Westwood was half way done and ea said release it on a certain date or its scraped.

Since EA took over C&C I would assume they have them and they probly scrapped em.

To anyone who is saying that Renegade looked better before, uh...no. Most of the beta models aren't that great, and the textures are god-awful. I'm glad they redid most of them.

I gotta say I like the way the sniper rifle looks in these pics, though that could have been the ramjet (I'm gonna assume it is the sniper rifle).

that big orange scope rifle=ramjet
green scope=500 snipe rifle
by the way, i very like it

The shadows (for dynamic objects) look like soft shadows. The other stuff aren't that interesting. Maybe someone could come up with a shader that generates soft shadows.

From those screenies, it looks like Renegade was going to have:

Dynamic shading/lightning/whatever
More sky effects
Mannable gun turrets (That show your character using it)
Corpses that stay there instead of disappearing

In exchange for:

Shitty texture quality
Shitty model quality

Ugh.

Shitty texture quality
Shitty model quality

Ugh.

Look at the second last picture up there. The corpses around the turret on the left look photoshopped in. Look at all the blurriness around them.

beta just had a cooler hud and had a lot more, then Westwood was rushed.

many of the models where replaced because they where not finished

<http://www.divshare.com/download/3696393-b44>

No I mean the tank actually drove off the hovercraft instead of drove off using an animation.
