Renegade is just like that really it is known to have random crashes but if it happened often then you probably have a problem

About the unauthorised renegade instance closed.

Does the "send report" only occur when you close renegade? If so, u can ignore this (scripts problem).

Sorry but it's hard to understand what you mean.

There will be no new scripts version anytime soon as its creator moved on to C&C3.

If you have scripts problems, then maybe you should consider downgrading to an older version of

scripts.
