---

Galactic Nemesis is currently a work in progress (WIP) massive multiplayer online role-play game (MMORPG). It will become a sci-fi PC game with many cool features (join us on IRC and ask me or geo987 for the details if you want to know more about it).

We're currently still looking for staff members, we need:

3DS Max modelers

C++ scriptors

Lua scriptors

Someone with knowledge on designing a network for the game

People with ideas are always welcome in our IRC channel (except when we're having private staff meetings in which case the channel will have a password key).

The game is being developed by WW-Gaming (World Wide Gaming) in the midst of our community reconstruction. Our TeamSpeak and IRC is currently being provided by St0rmNet, many thanks!

NOTE: We've got 10 people on our staff so far and the ideas are rapidly progressing, soon we'll begin on the 3D modeling.
