Hi

I was wondering if someone that knows how to make renegade maps. Can make me some Goldeneye 007 maps from the n64 game.

I use to have hours upon hours even days of fun on this game. My favorite maps was Complex, Temple, and Facility for multi player.

If no one can do it i understand.

Thanks

Actually I could try, but then I'll need loads of pictures from the map(s).

So if you get me a few images of your absolutley favorite map I'll try to make it for you.

Sincerely,  
Dealman

Well you also could just export it from a emulator to Renx

---

---

Sincerly,  
Dealman

Make the map for Reborn then

Will do.

LR01 wrote on Sat, 09 February 2008 13:23Well you also could just export it from a emulator to Renx

Well then the quality would be extremley poor, also I think the maps of a such old game mostly use aligned planes.

In my opinion it would easier to make a map completley from scratch via some pictures. I've been using this method for soon 2 years with 3D Modeling. So it shouldn't be to hard.

Sincerly,  
Dealman

so you just import maps from 007 into renx (in some way) and then just add some quality textures by yourself?

i have some n64roms (zelda) how do you get them imported in renx?

yes, you can, in this way

<http://www.renegadeforums.com/index.php?t=msg&th=24837&prevloaded=1&rid=20921&start=0>

that person once made a tut about it, dont know where anymore.  
but it comes down that you need the good emulator and a prog, and painfully retexture everything again

I found my ROM and set the emulator up and all. But i forgot how big the lvls are lol.

Here is one screen shot im the top player...

Its going to take a lot of screen shots how do you want to proceed??

Fudplex? Or something like that. I honestly reccomend making maps with the same layout, but much higher polygon and better quality textures. It's 2008, not 1998...

I personally don't know how to make maps yet. If someone wants to make it from scratch i can help with screen shots. Or i could even send them the ROM and emulator to walk through it themselves.

You could rip off GoldenEyeSource's work.

I dont think i would rip off there work if i could sounds kinda dishonest lol.

But i did just make my first test lvl for renegade.

At this rate i should be able to make these maps i say in a few years lol.

There is to many walls that have the wrong collision settings on it....they have that map in RxD. It is however a somewhat good DM map.

On the original map in 007 there is like 3-4 walls that is meant to be walked through. Kind of a hidden passage.

---

But there could be mistakes im not sure im really new to map making for renegade.

I used to setup proxies on the hidden sides of the passage walls in multiplayer.

Hail the Nintendo 64!

Microsoft was hoping to make an xbox live version of golden-eye, exactly the same (even the graphics!) exception of the multiplayer abilities. Too bad Rare won't let them do it.

If you really need a Goldeneye fix, download beta 1 of Goldeneye Source (Half-Life 2 engine).

havoc9826 wrote on Sat, 16 February 2008 18:05If you really need a Goldeneye fix, download beta 1 of Goldeneye Source (Half-Life 2 engine).

you could use the hl2 goldeneye source complex map but i doubt renegade can handle the polys and you would proly need to ask to use it.
