well i have been wanting 2 play renegade since ive gotten vista and i own the C&C first decade set so myrene is on there i cant get it 2 run cause just about everytime i try it i get an error which looks a little something like this errorcode #00000005 or sutmhigh along the lines of that nature which is what ive been getting after i installed renguard I have the 1st Decades all the other C&C games work except Renegade And I tried everything so far I got the same results

after everything patched and all that good stuff i get this

You need to play Renegade in admin mode and XP SP2 compatibility mode on Vista.

Obvious question, but have you tried running it without the compat modes?

Optionally, I suggest that you install Scripts 3.4.4 as they allow for better functionality as far as graphics are concerned, lol.

Try that:

- Install RR (<http://www.icefinch.net/files/ResurrectionClient-1.0.0.56-alpha.exe>)
  - start Renegade
  - when the game crashed, there is a crash dump file in the 'debug' directory in your Renegade directory. Send me that file (compressed to yrr<at>icefinch.net)
-

Before getting RR, try running wwconfig.exe in admin and xp sp2 - mode as well.

scripts 3.4.4 is installed as well as RR im trying 2 send u the file but it says that the message cant exceed over 10MB for attachment any other suggestions?

ive alrdy tried runnning wwconfig.exe in sp and admin before i came here

Compress it with RAR at maximum compression level, then it should be 9.something MB.

KoQTrunks wrote on Mon, 11 February 2008 15:49the message cant exceed over 10MB for attachment

1000KB = 1MB not 10MB

i dont have RAR and trust me whoever that was that quouted me thats what it says the whole file compressed in zip is 12.79 sumthing MB i kinda kno these things LoL

i dont want 2 download WINRAR but if i have to i guess i have no choice =[ probably be one of the onli few ways i can do so

That's the common crash ppl with Vista get when the game runs without admin mode and XP compatibility.

Okay I found the bug causing the common crash on Vista.  
If activating XP compatibility mode doesn't work for you, get Resurrection from <http://www.icefinch.net> and start Renegade. Apply the auto-update and it should run fine then.

Map? Server? Bugs like that happen all the time on laggy servers, or maps like Glacier Flying.

This is a bug in Custom Scripts, triggered by Resurrection. I'm currently trying to find a solution for this.
