Hi im a big n00b in c++,

at the moment i will test purchase Vehicles with commands !buy reconbike

I thought that i can use the Vehicle Crate out of gmcrates.cpp but very difficult to do that, because I'm newbie in C++

Can someone tell me the Sourcecode for it

Dont say "try and eventually you will get it working" or something like that

this will drop a recon bike like when you get a vehicle crate:
also add the cost and made it so it only works of the airstrip is online.

```
gmmain.cpp
class reconChatCommand : public ChatCommandClass {
    void Triggered(int ID,const TokenClass &Text,int ChatType) {
        GameObject *obj = Get_GameObj(ID);
        float Credits = Commands->Get_Money(obj);
        if(!Is_Building_Dead(Find_Airstrip(0)))
        {
            if(Credits >= 300){
                Commands->Give_Money(obj,-300,false);
                Commands->Attach_Script(obj,"reb_reconVehicle_reinforcements","");
            }
            else {
                Console_Input(StrFormat("ppage %d [WGC] You need $300 to use this command, Your AirStrip
needs to be Online!.",Get_Player_ID(obj)).c_str());
            }
        }
    }

Thats a problem with the cinematic file, can't tell you what it is from the pic alone though.

Hex wrote on Tue, 19 February 2008 17:16 Hex wrote on Tue, 19 February 2008 15:58 Team does not matter, the both use CnC_Nod_Recon_Bike

Incorrect, if the team is set to Nod, the GDI Guard tower will shot it down. To fix this you would have to set its team to neutral in the cinematic.
