Is it possible to bind a Renegade FDS to an IP? If so how?

does it not have some sort of IP command, in the release notes it says it does.

Quote:ip=xxx.xxx.xxx.xxx Specifies the IP address to bind to for multi-homed systems.

Quote:ip=xxx.xxx.xxx.xxx Specifies the IP address to bind to for multi-homed systems.

That looks like either a command line (\..\server.exe -ip xxx.xxx.xxx.xxx) or it's in an options file...

Edit - that's a command line option, says so in the Readme.

try what carrier mentioned.
create a shortcut to your RenegadeServer.exe
right click, properties and add this:

RenegadeServer.exe -ip xxx.xxx.xxx.xxx

obviously change the xxx's to ur ip.

FDS Popup error "invalid affinity" came up when that was added.

Because RenegadeServer.exe v1.1 (from v00d00) doesn't support it? But I could be wrong. See attached picture:

Original version is bigger but there aren't switches.

oh, but I never get windows like that 1 in the pic..

And, link to FDSmon?
