When I Instal TFD, I get this wierd popup for every other game except Renegade saying-
FATAL String Manager Failed to Initialize properly.

RA2 wont load up.
RA has no sound.
CC has no sound.
TIB wont load up.

Ne fixes guys?

And, Ive tried fresh installations. No luck.

Download TFD? You mean as in Warez? This forum doesn't support Warez. Go buy the game: it'll work.

If it's a legal copy, go get a replacement, the disk is probably scratched.

No its a legal copy, the disc is not scratched, and renegade works lovely I just cant get the other games to work.

C&C and red alert work but I get no sound out of them.

- Goztow I wouldn't buy an illegal disc of renegade

Might be overkill, but tried re-installing the OS?

Using Vista? Try XP SP2 compat mode on the installer and everything else.

You edited your post. The original said "I downloaded TFD".

That having said that, we were led to believe it was warez, something this forum does not endorse.

I'm not using Vista....Please think before you post.
I didnt say I was using Vlsta.

I have XP, Which I've stated many times before. (Not expecting you to search though)

Still, I'll look at your link.
If it helps, I'll let you know.
