1) What in level edit is invisible ingame but blocks units and tanks from passing or going in it?
kinda like a invisible block that ingame u cant see or cant walk though it

How to remove them from the Map ? (Serverside) just Deleting
these Folders ?

To do that you need to go to the instances tab.
But you are probably talking about invisible meshes, in which I do not believe can be removed
server side without the effect of someone "lagging" through them, plus the bug if you remove to
many LE rashes when loading the level.

Then you would have to put up pathfind blockers so they can't find their waypath. (Like being lost
in the woods without a flashlight when it is dark.)
