umm well i made a map just for fun but when I placed it in level edit it wouldn't open because it was rendered or something but I didn't render it well I dont think so anyways i've uploaded it please someone help me as I have no idea what i've done :S

thanx

just wondering if theres a tutorial on changing the sky and adding weather effects?

if not could someone tell me how cos that would be cool

thanx

That's made in LevelEdit.

Start up LevelEdit, load terrain and place desired objects and save. Then go to Edit - Background Settings.

There you see "Music", "Sky" and "Weather".

In Music you can put an .mp3 file which will be played as background music when the map is being played ingame.

In Sky you can set time of the day, e.g 00:00 will be night. You can also choose to have either moon (Full or Partial) or to have a sun. Also you can manage the clouds.

In Weather you can set if to have rain, raining ash or lightnings or snow. You can also manages how many particles per second that should fall. As well the heading of the particles and etc.

Play around a bit with it and get used to it.

Sincerely,
Dealman.

ahh yes i see cheers.

thought it was going to be more complicated than that but thanx

grrrr i need help again

i decided to make a new proper map (btw new at mapping). I wanted to make a volcano that pours animated lava out of it which I've done but I used the Renx scroll texture thing but I realized that it only does it for one texture, can I not have multiple scroll textures?

if not is there another easy way to set the same kind of effect?

Anyways here the map I made what do you guys think?

also can anyone tell me how I place the emitter on Leveledit?

Quite nice if it's your first time!

A hint to make it better, make an tunnel through the volcano for infantries to maybe use some strategies to win. ^_^

not bad quite better than me ^^ i suck at map making so i only work in level edit.
Anyways the flame looks a bit too big...
I'll see what can I do about the emitter.

cool thanx oh also the tutorial that helped me the most with that kind of map making was this tutorial on ren help <http://www.renhelp.net/index.php?mod=Tutorials&action=view&id=21>

also i've changed the emitter abit darker

looks more like a volcano eruption

also anyone know how to animate the emitter?
