Does someone know, if someone has fixed/boned and released the old Renegade-2-Models made by WW (Apoctank, Rhinotank, Crizzlytank, Prismatank, Lighttank, Transport, Kirov)?

The Vulture Helicopter I found boned...

Can you post the files for that Vulture Helicopter please?

Also, you can find models all working in a Renegade map called Islands_Evo.mix

Haha, we aren't using any of those Ren2 models with the shit textures :V

There was a mod that used to be over at C&C source. It had a gattling tank and a tesla tank in it.

Wow I can't believe I remembered that.

i fixed the rhino myself. i love it.

but last things to do with that models:

- crizzly must be boned completly
- kirov: (bone the weapons and rotors)
- apoc: apply its original texture
