lol...I think I remember which one that is. If it's the one I think it is, you have to...uhh...You have to get on top of a building by a big cargo plane...then a cinematic comes on...

You have to go up as many stairs and elevators as you can near the front of the ship, and you will

eventually find a bridge with lots of NOD soliers and a sailor in a white uniform, theres your card, same thing, just opposite ends of the ship for the submarine keycard.Hint: Its near where you sabatoge the SAM missile racks, and verrryyy near the Tiberium hold.

Down in hand of nod in the kitchen thingy where a civilian (chef) with flamethrower was, there's an elevator up. Stand in front of the door for a few seconds and it'll open and u can go up and get there.

i think it's som sort of bug. it happens to me elsewhere but i should be the same. i reload my quick save and try again but the lift work properly again. weird but at least i don't have to restart my mission again
