Subject: Renegade making me enter Logon info EVERYTIME...

Hello,

I have Renegade installed and logon usually through XWIS. But I got Gamespy and Ren IP now as well that I use to connect to servers.

Now everytime I log on through XWIS, it's asking me to type my password and select the country. I don't mind it that much but it's still a bit annoying.

Are there any solutions?

Much thanks...

EDIT: Typo

Go to "my information" and tick the "always logon with this account" box.

Yes, I did that. I tried almost everything. It somehow resets even if I come to the Renegade main menu.

I am reinstalling Rene now...let's see...

Thanks for your help, Goz...

Do you use Vista?

Yes

Oh and I re-installed as well. Same deal.

Run in admin mode? Vista can't register the change in the registry if renegade isn't running in admin mode. Might want to do the same for wwconfig.
