I can't stand it. A few guys and me find it hard to defend a base. Especially City. The AGT is useless. Me and a few hotwires place C4's around, inside & near, those 'hot' buildings but no, they get destroyed by an APC full of techs.Tell me, how do I counter em? Some servers doesn't have any starting credits so it's impossible to have a vehicle blockade.

put c4's infront of it. Say 10 to 30 yards, then have medium tanks and humvee's gaurding it. The humvee for killing the tecks and the medium tank for the apc, or have an apc gaurd the enterence and have the buggy run over the people or something.

Yeah, have a humvee at each entrance of the building they are trying to enter. They will either waste their C4 trying to blow it up, or die.

If you are using nod, you can just rush inside and chem spray their asses. That weapon seems to work quite well in closed areas. Or take a technician and throw remote C4.
