I love how the "The Executor" (Super star destroyer) comes up in "The Empire Strikes Back". And then hearing the imperial march. It's just fantastic and immense.

Makes me wonder what a Star Wars game would be like with C&C Mode as in Renegade.

Star Wars: Battle Front 2 is a lot like Renegade in my opinion.

Even the Level Editor works in the same way.

Someone was making a star wars renegade mod but he said it was taking up too much of his time and stopped.

That is a good example why you read the entire thread before posting a comment/how too.

There's level editors for a lot of FPS games.

http://en.wikipedia.org/wiki/List_of_level_editors
(someone should add ren's editor to this one)
