[View Forum Message](#) <> [Reply to Message](#)

The fog function needs bhs.dll on the client, players without bhs.dll would not have the effect. Players do not need another reason to not use the scripts.dll made by BHS.

Erm, this should work then...

```
class fogChatCommand : public ChatCommandClass {
void Triggered(int ID,const TokenClass &Text,int ChatType) {
    Commands->Set_Fog_Enable(1);
    Commands->Set_Fog_Range (0.5,25.0f,3.5f);
}
};
ChatCommandRegistrant<fogChatCommand>
fogChatCommandReg("Ifog",CHATTYPE_ALL,0,GAMEMODE_ALL);
```

Eherm, where is that problem to search in scripts for the ready useable script functions?

In "scripts.h" is all what you need about weather.

Try this

```
class fogChatCommand : public ChatCommandClass {
void Triggered(int ID,const TokenClass &Text,int ChatType) {
    Commands->Set_Fog_Enable(1);
    Commands->Set_Fog_Range (0.5,25.0f,3.5f);
    Commands->Set_Rain(10.0f,3.5f,true);
}
};
ChatCommandRegistrant<fogChatCommand>
fogChatCommandReg("!fog",CHATTYPE_ALL,0,GAMEMODE_ALL);
```

itworks now how i turn it off lol?

will this work

```
class fogChatCommand : public ChatCommandClass {
```

```

void Triggered(int ID,const TokenClass &Text,int ChatType) {
    Commands->Set_Fog_Enable(o);
    Commands->Set_Fog_Range (0.5,25.0f,3.5f);
        Commands->Set_Rain(10.0f,3.5f,false);
}
};
ChatCommandRegistrant<fogChatCommand>
fogChatCommandReg("!fogoff",CHATTYPE_ALL,0,GAMEMODE_ALL);

```

```

lol so im guessing thats all the weather changes.....now i got to figure out how to put them in a chat hook....sorry i know im c++ retarded but im guessing the way it is now wont work?

i think i understand some so let me try it out

```

1>.\gmmain.cpp(1592) : error C2039: 'Set_lightning' : is not a member of 'ScriptCommands'
1>      c:\users\lil blueyes\desktop\ssgm source\ssgm source\ssgm source\scripts.h(695) : see
declaration of 'ScriptCommands'
1>.\gmmain.cpp(1600) : error C2039: 'Set_lightning' : is not a member of 'ScriptCommands'
1>      c:\users\lil blueyes\desktop\ssgm source\ssgm source\ssgm source\scripts.h(695) : see
declaration of 'ScriptCommands'
1>.\gmmain.cpp(1642) : fatal error C1071: unexpected end of file found in comment

```

i get that message when i try to do lightning
how can i fix it?

```

class cloudsChatCommand : public ChatCommandClass {
    void Triggered(int ID,const TokenClass &Text,int ChatType) {
        Commands->Set_Clouds(10.5f,20.0f,9.5f);
    }
};

```

```

ChatCommandRegistrant<cloudsChatCommand>
cloudsChatCommandReg("!clouds",CHATTYPE_ALL,0,GAMEMODE_ALL);

```

```

class cloudsoffChatCommand : public ChatCommandClass {
    void Triggered(int ID,const TokenClass &Text,int ChatType) {
        Commands->Set_Clouds(0.0f,0.0f,0.0f);
    }
};

```

```

ChatCommandRegistrant<cloudsoffChatCommand>
cloudsoffChatCommandReg("!cloudsoff",CHATTYPE_ALL,0,GAMEMODE_ALL);

```

for the clouds.....the !clouds wont work but the !cloudsoff works....how can i get the !clouds to work

```

class windChatCommand : public ChatCommandClass {
    void Triggered(int ID,const TokenClass &Text,int ChatType) {
        Commands->Set_Wind(20.7f,15.0f,5.0f,3.5f);
    }
};

```

```

ChatCommandRegistrant<windChatCommand>

```

```
windChatCommandReg("!wind",CHATTYPE_ALL,0,GAMEMODE_ALL);
```

is there something im missing?

ps sorry its kinda alot i really am trying my best i got !snow to work and understood a little bit of it but im still...well...ya please and thank you[/size]

A helpful resource getting some values for the weather is LevelEdit. Make a new mod package, place a .lvl file into the levels dir and load up your mod.

The rest is shown in the picture. In LE click on EDIT -> Background settings and fiddle around with the values.

BTW back to the fog crate, I can help you with that. Thanks to Reborn, it's quite easy to create one based on his code.

helped a lot have not tested it yet but i have no yet found way to do the clouds

quick question when i put in a number like
180.0f

do i put it like this

180f

180.0f

or

180.00f

or

180.000f

It doesn't matter how many zeros you use, the compiler will treat them all the same anyway.

[View Forum Message](#) <> [Reply to Message](#)

well it seems likees evrtyhing fine but i cant get my
clouds
war blitz
lightning
wind

as for the lightning and war blitz or how ever you say iti did the command the way

EA-DamageEverything posted above with that info i made the chat hook

heres what i got

```
class LightningChatCommand : public ChatCommandClass {
void Triggered(int ID,const TokenClass &Text,int ChatType) {
    Set_Lightning(0.80f,0.00f,1.00f,239.0f,0.80f,3.5f);
}
};
```

```
ChatCommandRegistrant<LightningChatCommand>
LightningChatCommandReg("!Lightning",CHATTYPE_ALL,0,GAMEMODE_ALL);
```

```
class warChatCommand : public ChatCommandClass {
void Triggered(int ID,const TokenClass &Text,int ChatType) {
    Set_War_Blitz(0.80f,0.00f,1.00f,239.0f,0.80f,3.5f);
}
};
```

```
ChatCommandRegistrant<warChatCommand>
warChatCommandReg("!war",CHATTYPE_ALL,0,GAMEMODE_ALL);
```

another problem is how can i get the sky to change color? i've seen it on kamuix serv...they done it blue and green and red....i tried to ask them but no one answers i think they used

commands->Set_Screen_Fade_Color

if not can someone tell me what they used?
with that i tried to make this but no luck either

```
class greenfogChatCommand : public ChatCommandClass {
void Triggered(int ID,const TokenClass &Text,int ChatType) {
    commands->Set_Screen_Fade_Color(Get_Float_Parameter("green"),0.0f);
}
};
```

```
ChatCommandRegistrant<greenfogChatCommand>
greenfogChatCommandReg("!greenfog",CHATTYPE_ALL,0,GAMEMODE_ALL);
```

but im mostly sure im complelty wrong

pleas ehlp and thank you

Set_Lightning and Set_War_Blitz are part of the script Commands class, you need to put "Commands->" before them when using them. You compilers error message earlier was miss-leading, but I checked and it is part of that class.

I also checked these functions out at some point last year and noticed the effects seemed to do very little, if not nothing at all. Perhaps the distance and spread stuff is very sensitive, try diffrent float values ranging from very large to very small.

can u tell me why this wont work?

```
class greenChatCommand : public ChatCommandClass {  
    void Triggered(int ID,const TokenClass &Text,int ChatType) {  
        Commands->Set_Screen_Fade_Color(0.0f,255.0f,0.0f,3.5f);  
    }  
};
```

```
ChatCommandRegistrant<greenChatCommand>  
greenChatCommandReg("!green",CHATTYPE_ALL,0,GAMEMODE_ALL);
```

heres how i try to learn from

```
typedef void (*_Set_Screen_Fade_Color_Player) (GameObject *obj,float red,float green,float  
blue,float transition);
```

im guessing it may make shit green like iv seen servers turn the sky green and red and blue

Subject: Re: Script Request

Posted by [danpaul88](#) on Fri, 16 May 2008 20:57:59 GMT

[View Forum Message](#) <> [Reply to Message](#)

Well GameObject* obj should be a valid game object, and your just giving it a float with the value 0.0, which will either be translated as NULL by the function and fail safely, or will cause Renegade to crash due to trying to access an invalid pointer.

Assuming Int ID refers to the player ID you should be able to use something like GetPlayerByID (ID) to get the GameObject* to pass to the function. The function name might be slightly different to that, this is just off the top of my head.

EDIT: Wait, nvm, you not even using that first parameter for some reason, so I don't think you have the right function definition there...

Two minutes, hehe.

Dude, I am like reading the next page of the same book you're reading. Whilst others have had there library cards for years now and have checked out every book twice.

I ask others for help too ya'know. But if we all help eachother with what we know (without the ego's) then this place can become nicer.
