I am trying to install renegade core patch 2. The install gets to the ending and then says "Old file does not exist."

How can I fix this?

You probably didn't install patch 1.037 before installing core patch. Get it at ftp.westwood.com .

When I try to download the patch it says "Old file not found. However a file with the same name was found. No update done since file contents do not match."

Do you have The First Decade(TFD) if you do TFD does not need the patch.

Whenever I try to load the game without the patch being downloaded an error shows up.

Well then that is a sign that you need the patch.

Reinstall the game completely, following the steps in the reinstall-guide which you can find as a sticky in the "renegade client"-subforum. That will be the quickest solution.
