Hello, i was unable to make this script work on lua plguin.

Could you guys help me please...

```
function FindWords(Text)
```

```
-- This Function Made Soley By PsuFan
```

```
-- Please Read The Following Steps/Information Carefully
```

```
-- This function finds all the words in the message you send it
```

```
-- FirstW, SecondW, SecondPlus, ThirdW, ThirdPlus, and FourthW are whats returned
```

```
-- Installation:
```

```
-- 1: Copy this sub into your luaplugin.lua at the bottom of the file
```

```
-- 2: Add this line to the top of OnChat function > FindWords(Message)
```

```
-- Thats it! You can now use FirstW, SecondW, etc in your OnChat function.
```

```
-- This function is great for commands like !ban psufan because he sucks
```

```
-- !ban <name> <reason>
```

```
-- FirstW would equal "!ban"
```

```
-- SecondW would equal "psufan" or the <name>
```

```
-- Then the reason would be ThirdPlus ("because he sucks") or the <reason>
```

```
-- Key:
```

```
-- FirstW    = First Word
```

```
-- SecondW   = Second Word
```

```
-- SecondPlus = Second Word Till End
```

```
-- ThirdW    = Third Word
```

```
-- ThirdPlus  = Third Word Till End
```

```
-- FourthW   = Fourth Word
```

```
-- |||
```

```
-- Please Do Not Edit Beyond This Point, If this function isnt working properly for you,
```

```
-- contact PsuFan to assist you. This code is to complicated for you to fix anyway.
```

```
-- |||
```

```
Found = string.find(Text, " ")
```

```
if Found ~= nil then
```

```
    FirstW = string.sub(Text, 0, Found - 1)
```

```
    SecondW = string.sub(Text, Found + 1)
```

```
    SecondPlus = SecondW
```

```
    Found = string.find(SecondW, " ")
```

```
    if Found ~= nil then
```

```
        ThirdW = string.sub(SecondW, Found + 1)
```

```
        SecondW = string.sub(SecondW, 0, Found - 1)
```

```

ThirdPlus = ThirdW

Found = string.find(ThirdW, " ")
if Found ~= nil then
    FourthW = string.sub(ThirdW, Found + 1)
    ThirdW = string.sub(ThirdW, 0, Found - 1)

    Found = string.find(FourthW, " ")
    if Found ~= nil then
        FourthW = string.sub(FourthW, 0, Found - 1)
    end
else
    FourthW = ""
end
else
    ThirdW = ""
    ThirdPlus = ""
    FourthW = ""
end
end
else
    FirstW = Text
    SecondW = ""
    SecondPlus = ""
    ThirdW = ""
    ThirdPlus = ""
    FourthW = ""
end
end
end

```

Sorry that i posted the lua related topic here. People in forums.dcom productions.net arent visiting that forums alot so i wanted to get some help here.

As I said, there are not alot of people that are visiting that forum so i dontget help easily, but i have posted a topic there.

This is where i posted the topic.

You obviously underestimate the help you receive from certain small forums. DPDN is the mother of the Lua Plugin and Roshambo is the father (weird metaphore, omg! he mated with DPDN!). We support our own products.

Edit: I didn't notice you said you already visited our forums. But hey, we do sleep, keep that in mind!

Heavyx, can you please stop posting every single topic in general discussion. There are subforums for a reason. I really think a long time member as you should at least take the effort to choose the correct subforum. I'm a bit tired of always having to move your topics.

Make the Off-Topic forum, then we could post topics that are not related to renegade. Sorry anyway.

[View Forum Message](#) <> [Reply to Message](#)

But there are other topics I posted that belong in other forums and I posted them in the General Discussion.

If i post this stuff in the Spam Fest section, my topic is going to get infected by rocko!

This stuff should obviously go in the mod forum, where I moved it to.

Imo It could go in several places, Win32 forum(since the Lua plugin is a plugin for SSGM which is a renfds server manager), I also think it could go in the "Other Products" section also.
