Hello,
I get a error in the level editor if I the following Script loads: JFW_Character_Buy_Poke. I use new scripts.dll 3.4.4
What can the error lieke with?
With which version from scripts.dll does this go?
Sorry for my englich please.

I insert the Script with the Generic_Switch.
With an older version from scripts.dll no problems.
Because I build the servers new and my (festplatte = german) was broken I do not have old scripts.dll any more.
