It's been up. Also, what do you mean- you can't host a game or you can't join a game you have hosted?

I think the problem is your side. Please check the FAQ sticky on top, it covers a couple of common reasons for the WOL list not showing up.

To cmatt it wouldnt let me host a game because it said it couldnt connect to WOL server. Now its letting me host and join the game that I hosted but I still can't see other games.

To Goztow

I looked at the FAQ page and checked the firewall and the hosts file. Both seem to be all right. I can see the XWIS message and nothing appears to be wrong there. Then, when I connect to the USA server (since im in US) no game listings appear.

I'd say you're trying to use a nickname that is used already?
