ROFL! explorer.exe!
Are you infected with spysheriff or something?

ontopic
Try re-downloading the installer.

No, that was a clean install (Or, there was no real reason for it to be infected) - When I enabled DEP, it just kept crashing explorer, that was one of the most entertaining times I ever had on XP, save for the highly amusing time my "Shut Down" button disappeared. <3 .bat files.

If you constantly tweak your registry and computer like I do than I'm not surprised. If you don't then please go here.
