That looks like it is coming from the FDS what is your connection speed?

If you don't know visit <http://www.speedtest.net> and post the link it gives after you test it.

Thats enough bandwidth for about 6 players in AOW mode.

I would agree there, the Renegade FDS mostly uses the upload speed so out of the upload you have 6 players is probably all you could host.

Is There a way to get higher?
Oh and if i change it to 6 would it work?

Yes it probably would work if you change the player limit to 6 and to get a higher upload you would need to contact your isp and see if you could get a higher upload(of course this costing extra money).

You would have to ring your ISP and get a higher package which would cost you more. As to the player count, try it...If you still get the same message try just 4 slots.

Then the only thing I can suggest is to goto the creators forum www.nightregulator.com and ask

the maker, he would know exactly what to do.

Your correct. I do know exactly whats wrong, but tell me. What has this got to do with NR?
Absolutely nothing lol

What value do you have set for Upstream B/W under the 'FDS Settings' tab?

Well idk, he said that he had NR problem so im telling him to goto your forums :S

NR and I don't get along anyhoo!

Ok..sorry for going to different forums and i put it to 1

I think i didn't change that
