No offense, but "the shaders is bad" I appreciate people are finally trying to use shaders, but I'd really recommend waiting for scripts 4.0 to come out as it has shaders that actually work right (and look great!)

No, they don't. You'd think I would know, having written them and all...

Saberhawk, cant you just be a little nice?

Madrocks could of work hard on it and now he might feel really sad. Man come on, he did a great job. Nice job mate, keep up the good work!

I'm trying to save him some work as shaders 3.4.4 sdb files are completely incompatible with shaders 4.0 shd files.

Anyways, it wouldn't be fair for me to show off shaders with the textures applied, so here is the Nod Artillery with only lights enabled.

Sigh.

Could just be my eyes and where I am tired..But I dont see any lighting difference...It just looks like a normal arty.

Sadly, it's the lighting on the map. With proper lighting it looks far better.

So the lighting will actually be read from the map itself now?

Why are the wheels shiny?

Anyways, that sounds great, Saberhawk, if map's lighting affects stuff more.

nopol10 wrote on Mon, 30 June 2008 07:10So the lighting will actually be read from the map itself now?

Well duh, what's the point of having "advanced lighting" if it just ignores all the lighting in maps?

That's what the old (current) shaders did right?

A normalmapped tank in a tibfield would not color green, and sunlight would reflect inside a tunnel.

Exactly. That's just garbage and completely unacceptable

KristyGirl wrote on Mon, 30 June 2008 14:07 Does shaders eat through FPS?

scripts.dll 3.4.4's shaders, yes. scripts.dll 4.0's, no.
