I decided to take a crack at making skins. I got all the neccessary tools, and I can't seem to find what folder to save the dds plugin in for paintshop pro. Any help is much appreciated .

Edit: Sorry If I posted this in the wrong section it was the most fitting place I could find.

Default:
C:\Program Files\Adobe\Photoshop CS2\Plug ins\Import-export\[dds plug in here]

but the rest you can put in plug ins folder hope it helped

You could always use paint.net, it does DDS without a plugin

Thank you jonwil =).

I ended up getting that much easier.

Mine is located here.

C:\Program Files\Jasc Software Inc\Paint Shop Pro 9\PlugIns\dds.8bi

It works for DTX1. For the rest I use png and DDS Converter 2.
