Modified Scripts.dll by WittebolX  
with a little help from Roshambo, Hex, Reborn and madrockz

if you are done hosting AOW/TDM/CCTF/or whatever, then try this  
this dll contains some extra's that brings a brand new tactic to the game.

Veteran PLogin:

!vet = gives current Veteran info  
Level 10 = changes you into a Mutant Raveshaw Boss.  
Level 09 = activates a local Ion Storm towards your enemy.  
Level 08 = Power Down Basewide, Base both gdi and nod will loose power for 1 minute.  
Level 07 = activates a local Airstrike towards your enemy  
Level 06 = EMP Pulse Basewide  
Level 05 = gives you a Kamikaze Suit. (when you die, you will die with a BiG BANG)  
Level 04 = gives you a Ramjet Rifle  
Level 03 = gives you some Reinforcements on your location.  
Level 02 = gives you a Chaingun  
Level 01 = gives you some Proxy Mines

Vehicles: (all Nod vehicles require the Airstrip to be online, GDI Vehicles require the Warfactory to be online.

If you are getting sick of walking back to a pt to get a vehicle, then these commands are a nice solution.

then delete this topic, sorry im not posting any source because it took me forever to figure things out.

also, i dont wanna see my source screwed up and then get massive spam pm's about helping people to fix there problems while they edit the source.

i'm just adding a more tactical gameplay by posting some of my scripts i use in my server.

and i belive its up to me if i release my source of not.

if you dont agree and you feel my post must be deleted because of that, then please delete it.

im just supporting a dying game by uploading this dll

That is so selfish, if it took you forever to figure things out, then release the code so other people can "get it" too.

It's attitudes like this that kill the "dying game".

Nice one dude, it's the right thing to do

It's not like you're ever going to get rich on this game or simple coding (in comparison to most things), so it's better to share and help other people learn too. It will make other peopl ehappy and just maybe increase the longevity of the game
