What is the average amount of Character polys used in renegade that the creators used?

I need to know because of this Character I just modeled, it's high resolution poly is like 3600 polys..... And the Low polied version is 1452.

Any help would be appreciated,

Thanks,  
N1warhead.

You really shouldn't worry what the average polygon counts of renegade were 7 years ago because that is obsolete for the most part , unless nobody has upgraded their pc in that long. For characters they were originally only 700-1000 polygons, which quite frankly isn't anything at all these days.

I personally think 3k per character should be fine.

That is actually quite true .

I didn't think about it like that, thanks for letting me know.

Holy shit, N1warhead is such a bastard because he didn't look back to 2002 for answers to his question. As Blazea said, that's also pretty much obsolete, too.

LOL, no offense was taken.

Lol I liked your Answer though,

"I didn't mean it that way" LOL.

A LOL a day keeps the doctor away.

---

You seem to laugh in every sentence.

I like to laugh an keep a smile on my face, it keeps me happy.

Most people from where I am are like that, I guess it has a lot to do with DEEP Southern Hospitality lol.

Hehe yeah, same here.

I just know us Southerners love to joke with each other, so I am used to constantly laughing even at things that aren't funny because I am so used to it, I love to laugh I dunno why, I just love it LOL.
