Harvesters are easy prey, anyone ever tried to slow down a harvester by getting in a buggy etc, then having a head on collision with the harvester, he,he.Or just park you buggy right in front of it, that will slow the harvester down by at least 50%, then plarster the harvester with remote C4, wait until enemy units come near, their harvester then BOOM.

This is actually a question about a mission. In Armoured Assault where is the green key-card? I'm in the bit with the Hand of Nod and the only way I can see that I could possibly get round to the other side is through the HoN but I keep finding myself at these doors which need level 1 security clearence. Please help
