This is a small testing video of the mod for the new Character, also with bots shooting Mortars, etc.

Hope you all like this,

Here's the link to the video.

(It's mainly for the Characters, some stuff is still in beta, such as the Firing animations, etc.

NOTE - The Renegade buildings will not be used in the mod, this map was originally for something else.

Nice weapons and characters, but you definitely need new reload sounds.

You really mean that ?
Oh yeah, I plan on it.
Just never got to it yet hehe.

Ok thanks for letting me know .
