Well, if you really want to make those..... Learn Scripting. Those Drop texts are Pure Script

Well there are already a lot around so unless you want it to drop another vehicle except the official vehicles you can use the existing cncdrop text mods...

You can get lots of different stealth vehicles to drop here...

There are more about as well.

They are simple to make I don't know the total script code but by adding certain codes and stuff you can easily make a drop script to drop

[list]

[*] Invincible tanks

[*] Any tank

[*] Any tank anywhere on a map set by co-ordinates

[*] Drop AI

[*] can assign things to vehicles to get them to follow you, like my friend's mod killer buggies

[/list:u]

All together there not all that useful, if you really wanted with a drop script you can even get a mammoth to drop off a orca or if you want or vice versa.

well... search google for Renegade Scripting. That'll probably pull up some good info.
