Sorry but you are going to have to buy the game again.

Either that or you system restore back to when you had the game and then copied the serial via the registry. You then restore back to the current date, re-install the game with a false serial (as your registry version is encrypted) and then replace the registry version with your valid one.

I have bought many games on eBay for a cheeeep price while it should have been sold for higher price. Many of these seellers are old grandmas.
