Hey first time I got stuck in this and I've spent a long time trying to find my through this level. Anyways I'm on the mission where you have to find the scientists in that weird Nod mansion. I've completed almost all my objectives (unless theres more then some more you acquire later on). I have the Black Hand Stealth laser rifle (found it in a hidden room) and I've deactivated the alarm with the MTC (and in my rage I blew the panel up too) I'm at the helicopter pad but theres no chopper, the mansion is clear of enemies but I still hear talking...help?

DO you mean the mission the grip of the black hand?Make sure that the area behind the Cheatau is clear there is still several guys there. After that get the red card at the room where you hack the terminal than do down stair to rescue there is only chem warriors there after clear out every one go into the room and rescue Sydney then go to the Helipad and get ready to kill Mendoza.
