I have an upcoming portfolio review at the Art Institute and I'd like to showcase the old Renegade levels I made. If anyone could help I'd love to get some "glamour" shots of each level, somewhere around three to four if you're able to take that many. I need them by next Saturday. If you can help, just reply here with the screenshots... High resolutions are welcome.

Go around on each level I made, take screnshots (highest resolution possible) of what you think are the best viewpoints, post them here.

Can you post a list of the maps you've done? Maybe I could help you out.

Here's the ones I want, if you can also get them with full AA/AF that'd also work well too. Thanks in advance

BunkersTS
MetroTS
BasinTS
MinesTS
GlacierTS

Mars
Metropolis
River Raid TS
Golf Course
Country Meadow v2
The Woods Today

http://www.cncnz.com/files/renegade/maps.php

If you don't have them you can find most of them there or on some other map download place...

No, that was someone else.. I forgot who, but I definitely didn't do it. I made more levels than the ones I listed there, those are just the ones I want to show.

You made Mars? That's probably the most UNIQUE map ever.

http://www.megaupload.com/?d=H8JIRLYW

I used c130 drop mods to get an Orca for better screen shots.

Handy tip: Try reading the first post of the topic so you understand what the topic is about next
time. He's not asking for general Renegade screenshots, he is asking for specific screenshots of
those specific maps.

If you can go higher, that's great, but if not 1024x768 will work.

If I get some time I'll throw my ren up to my LCD's max resolution and get these for you. HD
graphics cards for the win?

That helps a lot! If you can get more shots of Metro (and Metropolis) plus the rest of the levels that'd work out great.

Yours work decently well, but I need something with a bigger and better view of the terrain - having no HUD helps, too.

http://ren.game-maps.net/index.php?action=file&id=1152

Download this and place in the westwood/renegade folder.

Then press F8 and type HUD 0, it will remove everything, then when taking screenshots, throw your C4 and switch to it, so you get a clear picture.

and this?

Subject: Re: I'd like some help

View Forum Message <> Reply to Message

Here's a few tips
1) http://ren.game-maps.net/index.php?action=file&id=1152
As Ironwarrior said, pop this in your data directory and type the console command hud 0
2) Find the biggest monitor in your house and set your scrren resolution to maximum.
3) Set all standard Renegade quality setting to max
4) If your system supports it, enable the shaders
5) Use first-person and the timed-c4 weapon. Then throw your only timed c4 for a weapon-less screen
6) Use the attached objects.ddb file (self-extractor)
Buy a GDI grenadier to enter Ghost mode. Space raises you while crouch lowers you.
This objects.ddb modification cannot be used as a cheat as you will not be able to connect to WOL and will suffer one-shot-one-kill.

File Attachments
1) SS_objects_v01.exe, downloaded 102 times

Damn, wish I'd of seen this sooner. It's past Saturday.

Are you still doing this? I can get you some at 2048x1536 with 4xAA (or 8xAA or 16xAA if you want, but I can't tell a difference), including supersampling for bushes, trees, etc., and 16xAF. I know how to remove the HUD, but the credits and small stats in the upper right remain (Edit: Saw the link above fixes this). Oh, and do custom skins matter? I assume they would since they change the way the level would look.

Subject: Re: I'd like some help

View Forum Message <> Reply to Message

Yes, custom textures matter. I'd prefer the levels look the way I designed them. As far as everything else you mentioned, anything above 1024x768 is great. Sadukar was on the right track, but a lot of his screenshots don't have the "awe" factor I'm looking for.

Thanks again to everyone who helped thus far.

Might be too late, but I took these shots of TWT before you released it and some of them look pretty nice
