I did a clean install of Visual Studio 2005 earlier and when i try to compile SSGM for the Reborn FDS it keeps on error-ing

about `_stricmp` and i have no idea how to fix it.

I've used this version of Visual Studio for a long time and it is the first time im running into this problem.

It only errors on the `_stricmp` and i am not sure how to fix it.

Does anyone know why it is doing this and how i can fix this so i can compile it again?

You need to include "string.h". It must have the ".h" at the end or you include some nasty stuff.

Nevermind, i reinstalled vs again and now it doesnt have that error anymore.
Strange...
